

This term our topic is RNLI and its volunteers.

We are very lucky to be having a visit from one of the RNLI volunteers who will talk to the children about the charity and how fundamental it is in saving lives.

Find out more and explore what the RNLI do at:
<https://rnli.org/>

In Science, we will be looking at the importance and dangers of water. We will study how it can be helpful for keeping us fit and healthy, how it can help other environmental factors and the dangers that can occur when we don't behave safely around water. We will also be looking at seed dispersal and germination.

In RE we will be looking at the traditions and beliefs of Sikhs and discuss the key question of does being part of the Khalsa make a person a better Sikh?

In DT we will be looking at constructing objects to float. We will look at different designs and materials used for building objects to float and the reasons for them.

We will evaluate designs and discuss possible ways to improve.

In English the children will be learning about Journalistic writing and alternative traditional tales.

We will also be revisiting sentence types such as Emotion word, comma and 2A sentences. In addition to this we will be introducing 'List sentences' with the children.

Mathematics

We will continue to work on a variety of areas of mathematics such as shape and space, data handling, methods of addition, subtraction, multiplication and division, time and fractions. We encourage the children to solve problems and use different mental strategies.

It is extremely important that the children continue to learn their times tables.

By now they should know by heart all multiplication and division facts for 2, 3, 5, 10!

Please continue to practise these at home as often as possible!

The children should also be able to tell the time at 5 minute intervals, so remember to ask them what time it is regularly!!

For any other tips, please ask your child's class teacher!

In ICT, we will study programs used for showing and recording results and how we can use ICT to represent data.

In P.E the children will continue their swimming lessons.

Our aim to ensure all children are able to competently, confidently and proficiently swim 25metres. They must show a knowledge of a range of strokes including front crawl, backstroke and breaststroke.

RNLI

Lifeboats

Curriculum Drivers

Rizzy Respect

We will be looking at the Children's right to be safe. The children will study different rules and strategies used to keep us safe.

Astro Aspirations:

Children will aspire to make a difference to their own and others lives. The children will challenge their growth mind-set to independently solve problems in real life contexts.

Planet Belonging:

Children will be learning about the impact that the RNLI have on our own lives. The children will also attempt to raise money to further ensure other are kept safe by the RNLI.

Other ideas to make and do:

- Use the internet, library and other research alternatives to find out more information about the RNLI.
- Use modelling materials to recreate an RNLI boat.
- Discuss the importance of the environment, focussing on the importance of trees in our local area.
- Read and discuss Traditional Tales and how they can be looked at in different ways (Alternative Traditional Tales)

HOME LEARNING

This term the children will need to create a piece of art inspired by the sea.

This piece of art will form an art gallery which will be made available to visit at a later date.

Children are encouraged to paint, sketch, colour or model their piece of art.

Any questions or advice, please see your class teacher.
